ASL Interpreters and CART Provided

PROGRAM DESCRIPTION

As the only annual conference in RI dedicated to Early Hearing Detection and Intervention, this event is key in bringing together health care providers involved with caring for children with hearing loss, as well as educators, families, and other important groups and individuals. This annual opportunity to learn and collaborate with others in the field is essential for our providers and families in RI, as well as our neighboring states.

A remarkable faculty of academics and clinicians who specialize in childhood hearing loss will be lecturing on management of children who have hearing loss and other disabilities; challenges in NICU hearing screening process; bilingual education; Cochlear Implants and their potentials and limitations; causes and diagnoses of late onset and progressive hearing loss. There will also be a workshop offered by educators of the deaf with a panel of teenagers with hearing loss who will discuss the different paths they've chosen. The seminar's learning objectives will be covered in both lecture and repeating morning and afternoon workshop sessions. Please refer to the itinerary for a full schedule. Registrants will be able to choose which workshops to attend the day of the conference.

LEARNING OBJECTIVES

- Select the appropriate test protocol for infants and children of different ages and understand what is required to make the testing reliable.
- Identify challenges that exist in NICU hearing screening/follow-up.
- Compare results of different test protocols to determine appropriate management.
- Identify techniques for evaluation of children with multiple disabilities.
- Describe hearing screening technologies appropriate for hearing screening of older infants, toddlers, and school-age children.
- List the advantages and limitations of each hearing screening technology.
- Describe NICU hearing screening practices employed across the US.
- Attempt open communication among professionals and community members regarding a deaf child.
- Address how interdependence can occur between a home, school and community.
- Examine and promote team building among professionals.
- Identify technology considerations for children with various disabilities.
- Describe changes needed to improve NICU hearing screening in the US.
- Provide appropriate counseling to assist families in understanding test results.
- Define myths and facts about ASL/English Bilingual Education.

TARGET AUDIENCE

- Educators
- Deaf/Hard of Hearing Service Providers
- Audiologists
- Parents/Caregivers
- Early Interventionists
- Speech Language Pathologists
- Health Care Providers
- Students Studying Communication Disorders
- Physicians
